Experiences

SAN DIEGO PADRES

March 2025–Present

Software Engineer, Baseball Systems

- Contribute to the development and upkeep of the baseball operations department's internal web applications using AngularJS and Flask, implementing new features and serving ad-hoc requests
- Maintain data ingestion processes for the team's Postgres database, transforming raw vendor data to useful aggregations with dbt and utilizing Python & Dagster to orchestrate operations
- Build reusable data visualization components with d3.js, integrating these solutions throughout the frontend to communicate complex statistics to users of all levels of quantitative expertise

THE NEW YORK TIMES

June–August 2024

Graphics Intern

- Built data visualizations and webpages for the Times' coverage of the French elections, the U.S. presidential election, and the NYT/Siena College Poll with Javascript and Illustrator
- Contributed to NYT Graphics' technical infrastructure with tools such as TypeScript-powered election data scrapers and Svelte dataviz components
- Designed mobile-friendly assets for NYTG projects, distributed on various NYT social media accounts

THE TEXAS TRIBUNE

January–May 2024

Data Visuals Fellow

- Used Python packages to scrape election data from the Texas Secretary of State's data portal
- Created data graphics as part of the Data Visuals team at the Texas Tribune using tools such as Illustrator, Javascript (d3, React), and Datawrapper

COLUMBIA DAILY SPECTATOR

December 2020–December 2023

147th Managing Editor/Vice President

- Led all journalism efforts of the Columbia Daily Spectator over the 2023 calendar year, editing and overseeing the production of over 1,000 articles
- Served as Vice President of Spectator Publishing Company,, managing alumni and student relations and ensuring the upholding of appropriate ethical standards in the newsroom

Graphics Editor

- Oversaw all projects of Spectator's award-winning Graphics team in 2022, leading the production of data-driven/visual storytelling experiences

SAN FRANCISCO CHRONICLE

June–August 2023

Digital Design Intern

- Created and updated React components used by the newsroom in visual longform projects, and contributed data visualization work with Datawrapper, RAWGraphs, and Illustrator
